Chapter

1	Background and motivation	1
1.1	Rubble-Pile asteroid surfaces	1
1.2	Shape modeling of small bodies	2
1.3	Dynamics and the YORP effect	4
1.4	Thesis statement	7
1.5	Thesis overview	7
1.5.1	Contributions	7
2	Image-based shape modeling	8
2.1	Introduction	8
2.2	2D to 3D mapping of images to shapes	9
2.2.1	Assumptions	9
2.2.2	Simulated image procedure	9
2.2.3	Mission data	9
2.2.4	Identification of the silhouette	10
2.2.5	Terminator and Limb Discrimination	14
2.2.6	Ray generation and trimming	15
2.2.7	Outlier rejection scheme	19
2.2.8	Surface reconstruction with ball-pivoting	19

2.3	Shape Results	20
2.3.1	Simulated Data	20
2.3.2	Shape modeling from mission data	23
2.4	Matching localization with Normalized Cross-Correlation	24
2.4.1	Methods	24
2.4.2	Results	25
2.5	Analysis	27
2.5.1	Error Evaluation	27
3	Boulder-induced YORP altering spin acceleration	31
3.1	Surface interactions causing YORP	31
3.2	Fourier YORP coefficient modeling	33
3.3	Boulder simulation design	36
3.3.1	Boulder Shape	37
3.3.2	Bennu and Itokawa surface qualities	38
3.3.3	Boulder population studies on Bennu and Itokawa	41
3.3.4	Applying a simplified thermal model with constant thermal lag	42
3.3.5	Polyhedral facet YORP evaluation	43
3.4	Analysis of boulder impact on YORP spin torque	44
3.4.1	Power law distribution of boulder size	45
3.4.2	Uniform Distribution of Boulder Location	46
3.4.3	Uniform Distribution of Boulder Orientation	47
3.4.4	Overall Uncertainty Distribution	49
3.5	Bennu Results	51
3.5.1	Total Boulder Impact	51
3.5.2	Large Influence Boulder Parameters	52
3.6	Itokawa Results	54

3.6.1	Total Boulder Impact	54
3.6.2	Large Influence Boulder Parameters	55
3.7	Sensitivity Analysis	57
3.7.1	Size Thresholding	58
3.7.2	Orientation Biases: West Preference	60
3.7.3	Location Bias: Polar Migration	62
3.8	Total YORP Discussion	64
3.8.1	Crater YORP	64
3.8.2	Tangential YORP	65
3.8.3	Overall YORP Comparison	67
3.9	Application to YORP Estimates	69
3.10	Summary and Conclusions	70
4	Pole Stability and Obliquity Evolution under YORP Torques	73
4.1	Background	73
4.2	Coordinate Frames	75
4.3	YORP Torques	77
4.3.1	Fourier YORP Coefficients	77
4.3.2	YORP Timescales	79
4.4	Spin and Stability Dynamics	80
4.5	Results	81
4.5.1	Boulder Distribution Effects	81
4.6	Discussion	86
4.6.1	Binaries	86
4.7	Conclusions	86
5	Estimates of YORP for Ground-Based Observing	88
5.1	Asteroid YORP measured from ground	88

5.2	Comparison of current models and observations	88
5.3	Boulder-induced YORP variability analysis	88
5.4	Other sources of uncertainty	88
6	Future work	89
6.1	Applications of Boulder YORP Modeling	89
6.2	Further investigations	89
	Bibliography	90
	Appendix	
A	Extra Things	105
